

# World University Rankings 2019 by subject: engineering and technology

2019

The 2019 *Times Higher Education* World University Rankings table for engineering and technology subjects uses the same rigorous and balanced range of 13 performance indicators as the overall World University Rankings, but the methodology has been recalibrated to suit the individual fields.

It highlights the universities that are leading across general engineering, electrical and electronic engineering, mechanical and aerospace engineering, civil engineering and chemical engineering subjects.

This year, we have made a small adjustment to the eligibility criterion for academic staff in the subject tables.
